Company Onboarding Guide

Real dashboard UI walkthrough — every page explained with side-by-side app preview.

Version 1.0 - 2024

How to Read This Guide

Each step shows **two panels side by side**. Left = what you do on the **real company dashboard**. Right = what the user sees on their **mobile app** as a result.

LEFT = Dashboard

What you do

RIGHT = User App

What user sees

Booking Flow Steps

1. User Books Service

2. Provider Assigns Worker

3. Worker Starts with OTP

4. Service Completed

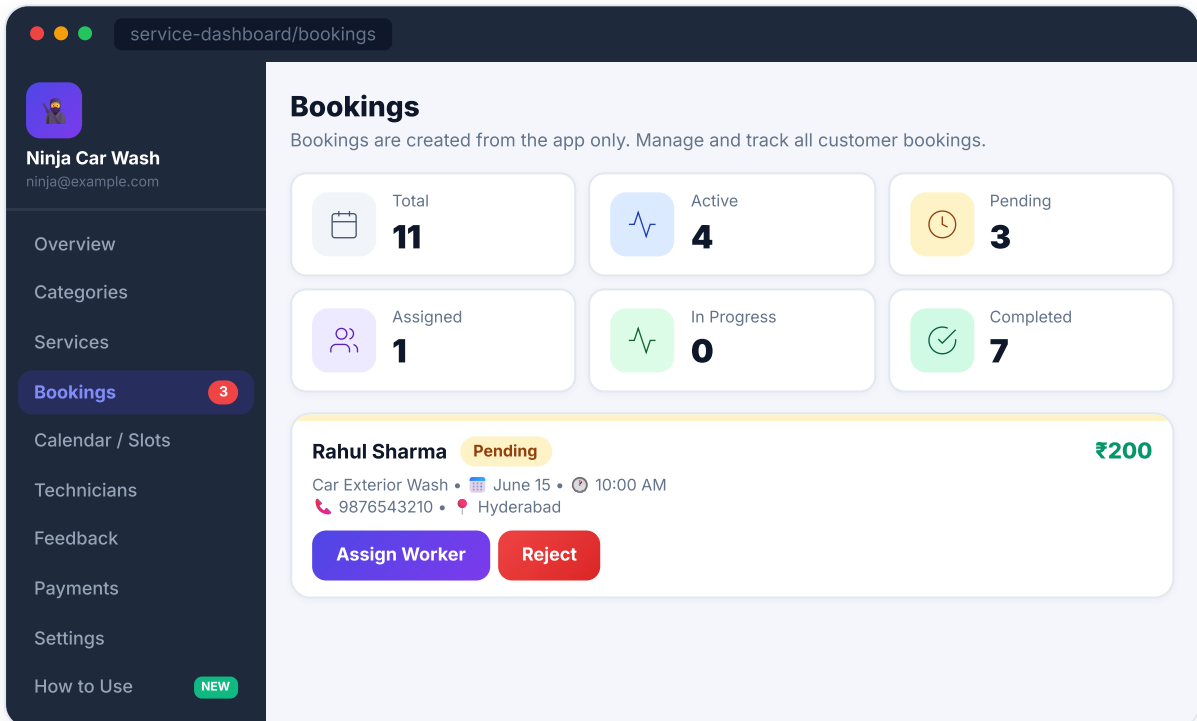

Complete Booking Flow

Step-by-step process: User books → Provider assigns → Worker starts with OTP → Service completed

SERVICE PROVIDER – NEW BOOKING

Step 1 – User books service

User books a service from your company. Booking appears as **Pending** in your dashboard. User details, service, time, and price are shown.

The screenshot shows a web dashboard for 'Ninja Car Wash' (ninja@example.com). The left sidebar contains navigation links: Overview, Categories, Services, Bookings (highlighted with a red badge showing '3'), Calendar / Slots, Technicians, Feedback, Payments, Settings, and How to Use (marked as 'NEW'). The main content area is titled 'Bookings' and includes a sub-header: 'Bookings are created from the app only. Manage and track all customer bookings.' Below this is a grid of six status cards: Total (11), Active (4), Pending (3), Assigned (1), In Progress (0), and Completed (7). A detailed view of a pending booking for 'Rahul Sharma' is shown, including the service 'Car Exterior Wash', date 'June 15', time '10:00 AM', phone number '9876543210', location 'Hyderabad', and price '₹200'. Two buttons, 'Assign Worker' and 'Reject', are available for this booking.

Status	Count
Total	11
Active	4
Pending	3
Assigned	1
In Progress	0
Completed	7

Rahul Sharma Pending ₹200

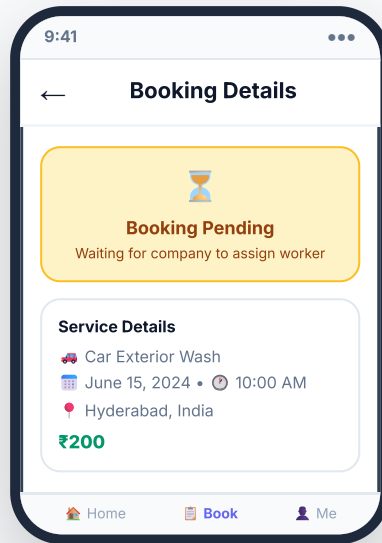

Car Exterior Wash • June 15 • 10:00 AM
9876543210 • Hyderabad

[Assign Worker](#) [Reject](#)

Action: Assign a worker to move booking from Pending → Assigned status.

USER – BOOKING CONFIRMED

User books service and waits for provider to assign worker

 User waits for assignment

SERVICE PROVIDER – ASSIGN WORKER

Step 2 – Assign worker

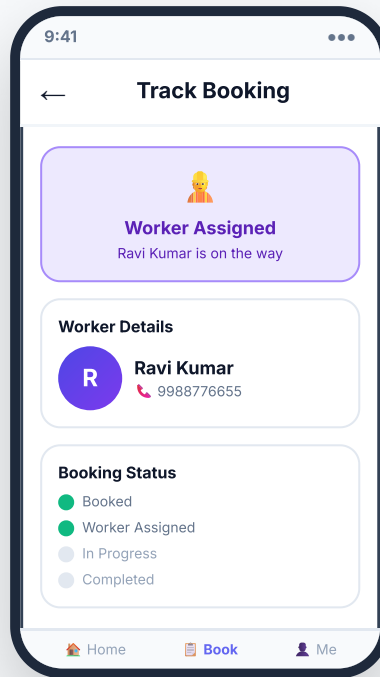

Provider assigns a worker to the booking. Status changes to **Assigned**. User can see worker details and track their arrival.

Action: Mark as Started generates OTP. Worker must get this OTP from customer to verify arrival.

USER – WORKER ASSIGNED

User sees worker details and tracks arrival

 User sees worker info

SERVICE PROVIDER – WORKER STARTED

Step 3 – Verify OTP

Worker arrives and marks as started. System generates 6-digit OTP for user.

Provider cannot see OTP – only user has it for security.

dashboard/bookings

Bookings

Rahul Sharma Started ₹200

Car Exterior Wash • June 15 • 10:00 AM
Worker: Ravi Kumar

 **Work in Progress**
Customer will provide OTP to worker

Enter OTP from customer

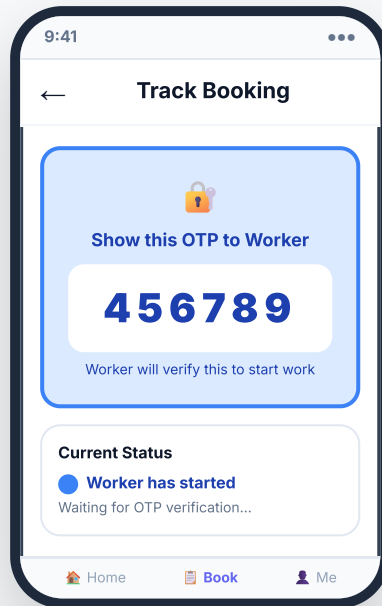

Ask customer for 6-digit OTP

 **Enter OTP & Complete**

 **Security:** OTP is NOT displayed on dashboard. Worker must get OTP directly from customer's app to verify completion.

USER – SHOW OTP TO WORKER

User gets OTP and shows it to worker to verify

 **User shares OTP
with worker**

SERVICE PROVIDER – MARK COMPLETE

Step 4 – Service completed

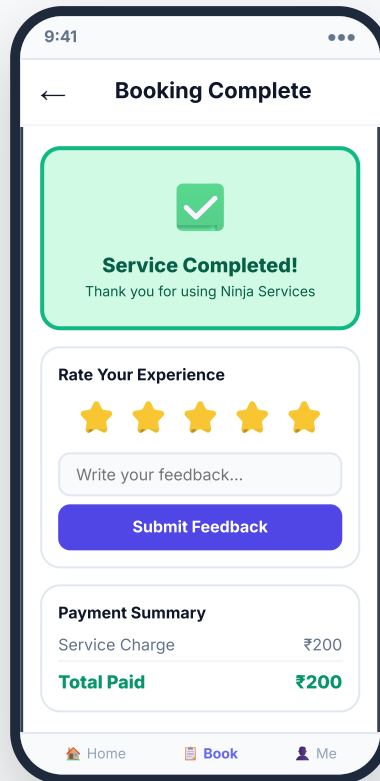

After work is completed, provider marks booking as **Completed**. Payment is recorded and user can leave feedback. Booking flow ends here.

Done! Booking is complete. Revenue is added to your dashboard stats.

USER – SERVICE COMPLETED

User sees completion confirmation and can rate service

 User can rate and review
